

Ecoustic® E208

OVERVIEW

Peavey Ecoustic Series amplifiers are highly versatile amplification systems designed for acoustic instruments, vocals and line-level devices such as samplers and audio players in performance and rehearsal applications. The Ecoustic E208 is rated at 30 watts peak and 20 watts RMS, and has a compact, lightweight design that make it ideal for rehearsals. The Ecoustic 208 features a built-in analog chorus and real spring reverb, and includes a headphone output for quiet practicing. The Ecoustic E208 and Ecoustic E20 are rated at 30 watts and 20 watts, respectively, and have a compact, lightweight design that make them ideal for rehearsals. The Ecoustic 208 features a built-in analog chorus and reverb, and both models include headphone outputs for quiet practicing.
